

Organic High Tunnel Peach and Outdoor Apple Production Field Day

Sunday July 14, 2024 10 am
Down Home Farm, Readstown, WI

Join the [Organic Fruit Growers Association](#) and hosts Jesse Downs and Liz Voz at Down Home Farm. See Jesse and Liz's innovative production of peaches in two high tunnels which protect the trees from severe Upper Midwest weather, and then tour their 1.5 acre outdoor orchard of high-density apples grown on dwarf rootstocks. Jesse and Liz have twelve years of experience growing high tunnel peaches. They market their fruits locally at farmers markets and to restaurants and food processors.

This event includes a two-part tour as well as a catered lunch:

- We will start at 10:00 at the home farm, E9106 Lyster Road Readstown, for an introduction to the farm and a tour of the high tunnel peaches.
- Then we will make a short one mile drive to S6263 North Lyster Lane to view the outdoor orchard planting and enjoy a catered lunch from [Maybe Lately's](#) in Viroqua.

Registration: Pre-registration is required!! OFGA Members pay only \$10 to attend this event; the cost for non-members is \$25. If you're not a member, or you have not renewed your membership for 2024, join or renew [here](#).

Members, click [here](#) to register for \$10

Non-members, click [here](#) to register for \$25

Registration deadline is July 7th
